## Exercise 1.1 : Complex Impedance Circuit

(written test, approx. 15 % of a 60-minute written test, WS2022)

A circuit designed to filter the noise from a signal shall be analyzed.

The input is given by a voltage source  $u(t) = 3.0 \text{ V} \cdot \sin(2\pi \cdot 15 \text{ kHz} \cdot t)$  with an internal resistance of  $10 \text{ }\Omega$ .

This linear source is connected with an inductor of  $330 \text{ }\mu\text{H}$  and a capacitor of  $0.22 \text{ }\mu\text{F}$ , all in series.

1. Draw the circuit diagram of the given circuit.  
Label all components, voltages, and currents.

Result

2. Calculate the single impedance  $\underline{Z}_C$ ,  $\underline{Z}_L$  such as  $\underline{Z}$  of the overall circuit.

Solution

$$\begin{aligned} \underline{Z}_C &= \frac{1}{2\pi \cdot f \cdot C} = \frac{1}{2\pi \cdot 15 \text{ kHz} \cdot 0.22 \text{ }\mu\text{F}} \\ \underline{Z}_L &= 2\pi \cdot f \cdot L = 2\pi \cdot 15 \text{ kHz} \cdot 0.22 \text{ }\mu\text{F} \\ \underline{Z}_C &= \frac{1}{2\pi \cdot f \cdot C} = \frac{1}{2\pi \cdot 15 \text{ kHz} \cdot 330 \text{ }\mu\text{H}} \\ \underline{Z} &= R + \underline{Z}_L + \underline{Z}_C = R + j \cdot \underline{Z}_L - j \cdot \underline{Z}_C = R + j \cdot (\underline{Z}_L - \underline{Z}_C) \\ |\underline{Z}| &= \sqrt{R^2 + (\underline{Z}_L - \underline{Z}_C)^2} \end{aligned}$$

Final result

$$\underline{Z}_L = 31.1 \text{ }\Omega \quad \underline{Z}_C = 48.2 \text{ }\Omega \quad \underline{Z} = 19.8 \text{ }\Omega$$

3. Draw the three impedance phasors  $\underline{Z}_C$ ,  $\underline{Z}_L$  and  $\underline{Z}_R$  in a diagram. Choose an appropriate scaling factor and write it down.

Result

4. Calculate the current  $\underline{I}$ .

Solution

$$\begin{aligned} Z &= \frac{\hat{U}}{\hat{I}} \quad \hat{I} = \frac{\hat{U}}{Z} \\ \end{aligned}$$

$$\begin{aligned} \text{With } I = \frac{1}{\sqrt{2}} \cdot \hat{I}: \quad I &= \\ \frac{1}{\sqrt{2}} \cdot \frac{\hat{U}}{Z} \quad &= \frac{1}{\sqrt{2}} \cdot \\ \frac{3.0 \text{ V}}{19.28 \text{ } \Omega} \quad & \\ \end{aligned}$$

Final result

$$I = 107 \text{ mA}$$
